Abdul Hafeez Khan

Frontend Developer

React · Responsive Interfaces · UI Animation · Expanding into Full-Stack
https://github.com/abhafeezkhan926-commits · https://www.linkedin.com/in/abdul-hafeez-khan-2754562b4/

SUMMARY

Frontend developer building modern, responsive web applications with React, Vite and Tailwind CSS, with a strong interest in motion design and interface craft. Experienced in turning designs into accessible, performant components and in integrating REST APIs into real applications. Currently expanding into backend development with Node.js, Express and MongoDB, with the goal of working across the full stack.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Vite, Tailwind CSS, Ant Design
UI & Animation: Responsive web design, GSAP, Interactive interface design, Canvas & SVG visuals
Backend: Node.js, Express.js, REST APIs, Authentication concepts
Database & Services: MongoDB, Mongoose, Firebase, Supabase
Developer Tools: Git, GitHub, Postman, Vercel

PROJECTS

PLAY.TV

Video platform · React + Firebase

A responsive video-platform-style web application with an explore feed, category filtering and search. Firebase Authentication unlocks liking, saving, commenting and subscribing, with library and history stored in Firestore.

Live demo: https://play-ten-phi.vercel.app/ · Source: https://github.com/abhafeezkhan926-commits/play

NexHub

Collectible car marketplace · React + Ant Design

A marketplace frontend with product discovery, cart and wishlist persisted locally, a validated multi-step checkout, and an admin dashboard covering products, orders, users and analytics.

Raven Operations

Company management system · Deployed application

An internal operations platform with separate employee and management workspaces, covering projects, tasks, attendance, leave and approval workflows behind an authenticated entry screen.

Live demo: https://company-management-tau-ten.vercel.app/

TRAINING

Saylani Mass IT Training (SMIT) *— Modern Web and App Development — Batch 18*

Project-based training covering the professional frontend workflow: responsive layout, component-based development, API integration and deployment.

INTERESTS

Frontend engineering with React · UI animation and interaction design · Component systems and design consistency · Full-stack development and REST APIs
